Customers

Loved the product, it works, tried everything else but this is the one that guarantees results!

During a stressful time lice squad was able to help. My family used the 1 time treatment and it was EASY!! I remember having lice as a child and sitting for hours to have my hair picked at. With the 1 time treatment it was quick and easy and no need for re-combing days later. Made a stressful moment much easier to manage.

Thanks again

It was a great product for someone who can't check their own hair. Worked great and got rid of the lice with the first treatment.

I brought a client to LiceSquad who had a case of head lice. My client is special needs and requires a gentle and calming touch. Andrea suggested the #1 Time Head Lice Solution. This product is amazing. Andrea applied it to the individual's head with a skilled and caring touch, providing no discomfort to the client what so ever. Andrea provided clear and direct instruction for the clean-up of the house and vehicles. We were provided with an additional comb out to see if there were any lice/nits left behind a few days after treatment. This product was amazing. Andrea was fantastic at making the client feel safe and taken care of. I would highly recommend this company and product to anyone needing their services. They do it right, the first time!

Yes we really liked the product. It was easy to use and comforting knowing it would only take 1 solution to fix the problem. We are very thankful Lice Squad provided us with this option as this was our first experience and we were anxious about getting rid of all the lice.

I loved the convenience and ease of this product. Having gone through lice before, it was so less stressful for us to apply knowing that one use would be effective. I will definitely use this again if needed. Thank you for recommending!

I just wanted to send you a quick note about my experience with Lice Squads new One Time Treatment.

I am the mother of three school age children. Over the years we have had to battle with Lice and those pesky eggs they love to leave behind. My girls have always dreaded the whole treatment process especially the hours we spend making sure each egg has been removed.

I have learned the hard way that if you miss even a single egg you will most likely be starting the whole process over again. There have been times I thought I would never be able to win the battle to be lice free.

Before Christmas my youngest daughter came home with lice again. I decided to try the new one time Treatment because i was told it would kill the eggs too...

I was so pleased with the results! Instead of using the shampoo every few days and combing daily I only had to treat her one time. When I did a comb through a week later she was lice and nit free! Two weeks later she was lice and nit free and three weeks later she was still lice and nit free!!!!

The product works wonders and delivers on the promise of treating once and being done. There is finally hope that we can win in the fight against lice and their eggs.

The product has a very pleasant smell and although it costs a bit more than the traditional shampoo it is worth every penny.

Thank you Lice Squad!

I discovered lice in my daughter's hair at bedtime and searched online for help. I found lice squad and received a call back within 5 minutes of hitting "send". I had an appointment the very next morning at the Mississauga clinic.

I was given options and chose to go with the 1 time service treatment for both me and my daughter. I knew I wouldn't be able to do the additional comb outs at home that is required with the other option. I was worried about the chemicals on our scalps, especially as my daughter has sensitive skin, but was assured that the process was gentle (and it was! Not even a tingle was felt!).

We were both treated in approximately 3 hours, including checks, application and comb out. We were sent home to wash out and treat our home with products and instructions. I left the clinic feeling confident that the problem was over.

*As instructed a few days later, I did a comb out to get any leftover, dehydrated eggs that may be left on the hair. Not even one was found!! Kim had done such a great job!
The additional expense was worth every penny and I would recommend Lice Squad and the 1 time treatment to anyone.*

Trina is the best, my daughter's lice was gone in a matter of an hour! I totally recommend her for your child and the whole family and it can be mobile so she can come to your house!

I love working with the #1 Time Mineral. I have used it numerous times and it really does get the job done. The application is super easy and I find the comb out is much more time efficient than the standard enzyme treatment. This is my preferred removal method, hands down!

I have worked with Lice Squad for over 9 years and I was so excited to hear about the launch of #1 Time Head Lice Solution. I was even more eager to start the hands on training.

I was amazed at how quickly #1 Time not only dehydrated the lice, but the eggs as well! #1 Time Head Lice Solution is great news for parents because they only need to comb a week later to remove any debris, and they are One & Done.

Thank you to Dawn, the CEO of Lice Squad, for her continued dedication to creating effective and efficient all-natural head lice solutions for parents.

I have literally watched adult bugs drop off the hair during treatment done on a man with a severe infestation. So I have no doubt the product works.

"I tried the new 1 time product on my daughter's head this week (yes she had lice from camp!!) Amazing- those nits and lice came out like pancakes- I was shocked."
